

The meeting was called to order at 6:45 at Ken Eggert's QTH. Previous meeting minutes were read and approved as written.

Treasurers report: Les KB9QZQ, reports club liquid assets at \$3100.69 on 12/15/00 plus our CD and on 1/15/01 the total liquid assets were \$3476.65 plus the CD. Special note to all members, your dues are now due. Dues not received by February will not be recorded in time so that the member will be listed in the new roster.

The next board meeting will be at Tom, KF9PU's QTH. Feb. 19th.

Notice to all members: The board will start the club business meetings at 7:00 at all meetings this year. This will give more time for programs and allow members to get home earlier.

Matt, KB9PRC, is trying to arrange with Fred, W9NZF, to give a talk on code keys at the April meeting.

This Thursdays meeting will be on the latest news with the repeater. Along with pictures.

All Chatters for this year will come out every 6 weeks instead of 4. This will save the club money and keep the yearly budget in the black without raising the cost of dues. The Christmas party actually made 23 dollars and didn't cost the club extra as in years past.

VEC news for John, KF9XL, all testing will cost \$8.00. We will be testing at Super Fest at AES. The club will also have a table at the Fest. We need volunteers to man the table.

MRAC will be conducting classes in March for the Tech license. and April through May for the General class. The next Chatter will have all the details.

The board has entertained the idea of engraved badges for MRAC members. The badges would sell for a small profit as a fund raiser. This badge could be used in place of the paper badges we issue at the beginning of the year.

Dave has almost completed the final layout of the club history that will be in a small book ~~to~~ to be given to new members when they join the club. The history book will also be available via computer. The computer version will be in color.

Fred Linn, W9NZF, called Jim, WB9LNU to confirm that our Field Day site at the depot is available to us again this year. As usual the club picnic will be held on Saturday during Field Day. The Board has approved a donation of \$200.00 to the church for some equipment they wanted to

purchase. The church has consented to the use of their room by MRAC for another year.

Dave would like to have a committee formed to develop ideas to improve the number of users of the club repeater. Any volunteers or ideas? Dave also wrote to the new central division director and is waiting to see if we get a response.

Finally some observations made by Dave over the last year. We always seem to have the same people volunteering to do things for the club. The others seem to come for the entertainment?? The nets on the repeater and 10 meters seem to always be the same. Not so much interest in the club Christmas party any more!! Field Day?? Classes?? Answers???

Respectfully submitted,
Jim WB9LNU
Secretary

The meeting was called to order at 7:00.

Thanks to Barbara for having us at her QTH. Special notice from Barbara!!! Effective the end of April, she and Ken will be moving to Alabama. She will be missed by us all. She has been very active on the board for several years and helps monthly with the Chatter. Ken has been helping with classes. They have helped on a regular basis with VE testing. They both were at Field Day last year and surprised us all with a hot breakfast. Barbara stayed up all night making contacts. We hope that we can stay in touch via the internet and the HF bands.

The minutes were read and approved as written.

Treasurers report -- Feb. total liquid assets \$3433.22 and March total liquid assets is \$3652.19 plus the club CD.

Dave thanked Barb and Ken for all they have done to make MRAC a success. Says that he will find it difficult to replace them.

Future board meetings -- April, Matt's QTH, May 29 on a Tuesday at Jim's QTH since the Monday is a holiday, June at John Merkl's QTH.

It has been confirmed that the June club meeting will be held at the Confederate Air Force hanger at Crites Field in Waukesha instead of the church. Watch the Chatter for a map and gate code number to get in.

VEC report -- John and Tom are working on having a written VEC policy for doing license renewals and special rules regarding handicap testing etc: Tom will purchase a paper shredder to dispose of all files that are more than two years old. John also reports that lately we have more examiners showing up at test session than people taking the test. He may consider reducing testing to once every two months or some thing like that.

Ken reports that Tech. classes went well at AES. There were 9 people in the class. Bill Lubitz will do the general class which starts two weeks after Superfest @ AES. Ken suggested that we talk to the West Allis Club and see what their ideas are about classes and maybe coordinate so we are not doing classes at the same time.

Field Day -- Brian has suggested that we try harder to make more contacts and increase our score. Thought maybe offering a certificate to the club member that makes the most contacts. Dave says that the ARRL is offering the Field Day pin again this year and you can also order a Field Day T shirt. Brian also thought he would like to see a 2 meter ssb and 430 mhz. station. Even 6 meters would be nice. Jim said he would see if he has any antenna's that could be set up for those bands. Note that Field Day comes before the June meeting at the CAF hanger.

Dave is still researching the club engraved badges. More on this at the next meeting.

Dave has completed the layout of the club history book. John Merkl is having it printed and will distribute them at the club meeting to save postage. Dave made special extra large history books with each page encased in plastic to be used at the club table at a swapfest etc: The special copy includes color photos of some members and Field Day. Also some photos of club activities in the past.

Repeater news -- Tom Sherlowski has been added to the list of control op's. When the weather improves, more antenna work will be done to see if the signal to the south can be improved. The friday night 2 meter net needs a permanent net control. To date the control has been passed to whomever is the first to come on the air friday night.

Dave is still trying to fully develop a business plan with new goals etc: for the club this year. The main idea is to get more involvement from the regular members who come to the meetings every month and have committees to decide the future path of the club. Example, a committee to make all the arrangements for the club Christmas party.

Meeting adjourned at 9:20.

Respectfully Submitted,
Jim WB9LNU
Secretary

MRAC Board Meeting

4/23/2001

The meeting was called to order at Matt's QTH.

Previous meeting minutes were read and approved as written.

Treasurers report -- \$3,470.05 in liquid assets plus the CD.

VEC -- John, KF9XL, asked if he should maintain the MCI long distance service set up by Ed Wille for the VEC. It is not needed any more because the testing results can be sent via the internet. The board decided to drop the expense.

Tom, KF9PU says they had 27 at testing at AES Superfest. He also reports that he purchased the paper shredder for old VE documents. VE paperwork need only be saved for 18 months. Only the CSCE's are kept longer.

Dave and the Board members thanked Matt for the use of his QTH.

The next board meeting is at Jim, WB9LNU's QTH. The following at John Merkl's QTH.

The May club meeting will be the clubs annual auction night and June will be at the CAF hanger at Crites Field in Waukesha.

Dave will ask the members to contribute pictures of themselves at their stations, Field Day or any club event, to put in a new photo collection for the club. The pictures will be stored in digital form for use in the Chatter or any other publication the club may have.

Dave reports that the club school had 10 people in the General Class. We are looking for a replacement teacher since Ken is leaving. The code class is still in an organization stage.

Field Day -- June 23 and 24th at Pioneer Village. Fred Linn says it's O.K. if we use a BBQ grill. Matt has volunteered to take care of the food. Kate thought it would be nice if we had a club T shirt or Field Day shirt. Dave said the shirts are available through the ARRL.

Fancy club membership badges are available through special order. Dave has worked with Capitol Engraving to design a club badge. They are available for \$8.75 plus \$1.00 shipping. Call 1-800-628-4985. Tell them you want a MRAC badge and give them your personal info. You can pay for it with your credit card. Capitol Engraving is in QST.

The club history is now available in color through the club WEB site. It is in a PDF file.

The repeater committee needs another volunteer to replace Ken. The committee is responsible for coming up with a plan for future repeater sites and system additions. As well as developing a

plan to increase use. In 2004, the repeater may have to be moved to another site because the existing building may be vacated.

The club Christmas Party -- Vern has made all the reservations. We now need someone to volunteer to take care of all the details, such as the menu selection and gift ideas etc:

Finally, Dave would like to establish committee's to take care of regular yearly events. These people would report to the Board on their progress. The group leader does not necessarily have to be a Board member. The idea is to include more of the membership in the planning of club events and foster new ideas. Any volunteers????

The meeting adjourned at 9:00.

Respectfully submitted,
Jim WB9LNU
Secretary

MRAC Board Meeting

5/29/2001

Previous meeting minutes were read and approved as written.

Treasurers report -- No report due to Treasurer being on vacation.

June Board meeting will be at John Merkl's house , WB9PSE.

Matt, KB9PRC, has volunteered to be Treasurer at the club auction on Thursday night in Les's absence.

The July meeting will be audience participation night. Subject will be the type of radio's used by the members.

Dave, WB9BWP, asked for volunteer to update the by-laws. Jim, WB9LNU volunteered.

VEC Report -- John , KF9XL, says he will not be going to the National NCVEC Meeting this year. And testing had 17 people at the Holiday session in the end of May. John also says that he knows a few people that are willing to help as back-up VEC. Says that the person he picks will have to be computer literate.

Field Day -- All is ready! Matt will bring the food.

Classes -- The General class is now complete. It went for 6 weeks. Dave is waiting for some Gorden West stuff that can be used as teaching aids. The CW over the air is still not established. Dave says he would like a committee to be established to formulate the classes and schedules so the Board doesn't have to be involved all the time. The Board will help in every way possible, but this is a chance for some member participation. Special thanks to our hard working teachers!

Roster -- The new Roster is now ready for distribution. The exact method of distribution has not be determined yet. Perhaps as an addition to the Chatter and via E-Mail.

Chatter -- The electronic version will be held to 500k whenever possible. This will help members with slow modems.

Badges -- Member cards are ready. And the plastic version is available through Capitol Engraving.

Repeater -- Nick, KA9LUW has volunteered to be on the future's committee. The technical group will be trying one antenna to see if better results to the south can be obtained. Also will be experimenting with shielding inside the new repeater to see if shading the receiver by the transmitter can be reduced.

The President will ask for a motion at the club meeting to accept the candidates for re-election and one new Director since no-one else is running for the 3 positions.

John Merkl says he possibly will have time to handle the details for the Christmas Party. Any more volunteers????? Thanks again Verne, W9RYA, for finding a site!

Dave, our President, would like to establish a policy for exactly how we should handle questions that are on the club's telephone answer machine. Technical questions can't be answered unless we have a volunteer that want's to tackle these problems. Example: We have people asking what would happen if they change capacitor values in some experimental circuit they are working with. It's obvious we need someone technically inclined to do this. Any volunteers?? The answer machine is at our VEC's QTH.

Dave's final note: Volunteer's for committee's are needed. Membership participation is low. How do we get more members active?

Meeting adjourned at 9:20.

Respectfully submitted,
Jim WB9LNU
Secretary

MRAC Board Meeting

6/25/2001

The meeting was called to order at 6:50PM.

Previous meeting minutes were read and approved as written.

Treasurers report: May \$3,794.92 total liquid assets and June \$3593.16 total.

Thanks to John, WB9PSE for having us. Next board meeting will be at Tom's QTH, KB9RLB, our new director. Dave will provide address info with his meeting notice.

The June club meeting will be at Crites Field with the CAF, so no meeting minutes will be taken. The July meeting will have a discussion between members on what radio's are being used and likes and dislikes.

August meeting will be on Field Day including a video taken by Roger, W9UVV. The September meeting might be another field trip to the microphone museum on 2nd and National St.

Dave reports that the club auction night brought in \$250 for the club. He was disappointed that more people didn't bring more equipment to sell for themselves. The auction was to stimulate interest in coming to a MRAC meeting by outsiders.

Tom, our VEC is going to the NCVEC this year. He will report on their discussions when he gets back. The conference is on the 27th of July.

Brian, K9LCQ, our Field Day Chairman, reports that the club got close to 2000 points this year. Dave says that Bill, W9WCF, has an antenna he will sell to the club so we have one for each of the club radio's. Jerry, WA9CGE, brought his VHF radio's and antennas. And several others brought their stations. All together we had about 8 stations.

We even worked a satellite contact thanks to Brian, K9LCQ and several members helping. The club picnic was Saturday and Matt, KB9PRC did the cooking. Les, our treasurer will order some Field Day pins from the ARRL.

Jim, WB9LNU, presented Dave with the latest update of the club's BY-LAWS. The final draft will be discussed at the July Board meeting and presented to the membership for a vote at the August meeting. The new draft which is our Millennium edition, has all the latest details of club operation in it. Example: E-Mail to members, the original number of officers and directors that the club had years ago, an article for all the things we spend money on, repeater, Chatter, equipment, etc:

Classes -- Mark Tellier nad Patrick Moretti will run the Tech class in late August. Course format is up to them. The Board will only be involved if they need money to cover any expenses. Dick, WB9PTC is still doing whatever he can with CW. Total dedication to helping others even after just getting out of the hospital. Talk about ham of the year material!

Roster -- The roster will be available at the July meeting and thereafter.

Dave's photo collection -- still waiting for the members to give him some pictures at their stations and of their antenna's. Will try to make a digital photo collection soon.

Repeater -- Some modifications are being made to the repeater internally to improve the RF shielding between the transmitter and receiver. Also Jerry, WA9CGE, has made a J pole that will be tried to see if the coverage improves.

Christmas Party -- The location is at the Machine Shed and John, WB9PSE, has volunteered to make the detailed arrangements. John is asking for a couple volunteers to help him.

The club has made a \$20.00 contribution to QSL.NET (OUR WEB SITE HOST).
~~Dave~~, WB9DWP, updates the info on the site.

Kitchen duties -- Myron has indicated that he can no longer do the job and Alfred says he will only continue to help behind the counter. We need a new volunteer to purchase the soda and doughnuts and bring them to the meeting. As well as do the serving. No volunteers will result in no drinks or soda being served.

Presidents final comments -- It's surprising that our members who comment the most about the use of CW are not the ones volunteering to help newcomers and existing members with their CW. Also there seems to be a tremendous lack of volunteers to do various things such as plan for the Christmas Party etc: The members always expect the Board to do the work for them, which is not the function of the Board. Should Field Day and other club generated contest be controlled by a permanent committee???? If so, who cares enough to volunteer????

Respectfully submitted,
Jim WB9LNU
Secretary

MRAC Board Meeting

7/27/2001

The meeting was called to order at 7:00.

Special thanks to Tom, KB9RLB, for having us so quickly after being elected.

Treasurers report -- As of 7/15 , \$3,459.53 total liquid assets.

The August board meeting will be at Dave's QTH.

The Thursday meetings will have discussions on Field Day and other modes such as slow scan TV.

Brian reports that Field Day was very good this year. He had the most fun this time. The total points was about 1972. Dave has commented that some members out did themselves this year to make the event a success.

The Board has elected to leave the new By-Laws as written and present them to the membership for a vote. The new By-Laws have several additions to better reflect the things the club spends money on and the rules governing the expenses. They also go back to the original format that the club had many years ago. The 2nd VP and one director has also been eliminated, as they were not part of the original by-laws either.

Classes -- Mark Tellier and Patrick Moretti will teach the class. They will start Sept. 22nd. Class size is limited and pre-registration is required prior to Sept. 10th. The fee for members will be \$5.00. Non-members \$20.00 plus they must buy their book in advance from AES in addition to the course fee. If the minimum number of people do not sign up, there will be no class. The charge for the class will help the teachers recover their expenses such as overhead slides etc:

The Roster is ready and you can pick up yours at the meeting

The repeater is undergoing several antenna experiments and other changes. Dave finds it disappointing that so few members are willing to get on the net. Wonders if its worth all the trouble? Jerry , WA9CGE, has made two new J-pole antennas for the repeater.

Christmas Party -- John, WB9PSE, has made further arrangements. The dinner is Dec. 2nd. @ 6PM ,drinks and QRM start at 5:00. John needs help, a committee for prizes and other details. Please volunteer!!!!

The October Board meeting will be a discussion on next years budget. The new budget will be hammered out at the November meeting.

Dave will be appointing and looking for volunteers to be in various committees. Examples: Newsletter, VEC, Programs for meetings, Meeting refreshments, Raffle, Field Day, Christmas Party, PR, and Classes. In January he hopes to have the basis for these committees.

The meeting adjourned at 9:10. Thanks again to Tom.

Respectfully submitted,
Jim WB9LNU
Secretary

Previous meeting minutes were read and approved as written.

Treasurers report -- \$3,354.74 total liquid assets.

Special thanks were given to Dave for having us. Next Board meeting @ Tom's QTH and the October meeting at Matt's QTH.

The September club meeting will be on slow scan TV. The October meeting will be on model rockets with radio's in them.

Dave, our president, reports that our repeater was struck by lightning and sustained some damage to the antenna and the repeater itself. Matt, Dave, Mark and others removed the repeater and are doing bench repairs. More info next month.

Matt has requested that any club member interested in helping with a meeting program please speak up. Any subject related to amateur radio or operating practice is welcome. Please call Matt and volunteer.

VEC report -- Tom, KF9PU, went to the National Conference of VEC's this year. They had discussions on the extra class question pool and digital modes. Some also asked for additional questions on operating courtesy. When the new extra questions are complete, then they will revise the new Tech questions. It was noted at the convention that the Tech class still remains the most popular class for newcomers. John, KF9XL, says there will be no testing in December, March June and August. All other months will be the last saturday of the month as before.

Our VEC's and VE volunteers have done an exceptional job and should be commended whenever you get a chance.

The vote on the new club By-Laws will be voted on soon. Be sure to pick up a copy if you are interested.

Classes -- Special notice: If you are late with registration there will be an additional \$5.00 charged. An Extra class may be scheduled next before the new extra class question pool comes out in July. Watch the Chatter for class schedule updates.

CW -- Dick, WB9PTC, will do mondays and wed. over the repeater if its operational. Matt and Mark have been sending to each other monday through thursday from 9 to 10 PM. They started with ABC's and eventually to sentences. Said they were having fun.

The club will have a table at the 91 swap fest Nov.3ed.

It has been suggested that we have someone be our official greeter at the meetings especially for anyone that seems to be a newcomer. Tom suggested that we put the meeting agenda on the 91 service net every month.

Christmas Party -- John, WB9PSE, is working on the details of the party and needs help. Questioned, do we need gifts and flowers or should we save on the expense. The approximate cost to a member for dinner will be about \$18.00 Pancho will have the details in the Chatter and the registration forms.

The meeting adjourned at 9:00.

Thanks again Dave!

Respectfully submitted,
Jim WB9LNU
Secretary

MRAC Board Meeting

9/24/2001

The meeting was called to order at 7:00 at Tom, KF9PU, QTH.

Special thanks were given to Tom for having us.

Minutes of the previous meeting were read and approved as written.

Treasurers report -- \$3,423.91 in total liquid assets and the table for the 91 swap meet has been ordered. The budget report for this year will be ready for the next Board meeting.

The October Board meeting will be at Matt's QTH.

Dave, our president has decided to show video tapes at the Thursday meeting due to the absence of Matt. The October meeting still has model rockets with radio's scheduled.

The 10 meter radio raffle will start at this meeting. 150 tickets will be sold and then the lucky winner will be drawn from the barrel. The drawing will be held at the club Christmas party. You do not have to be present to win!! Each ticket will be \$1.00. Anyone can buy one.

Dave will explain the ticket process at the meeting.

Dave estimates that the club has made over \$600 this year on auctions and raffles of the donated equipment from our very generous members.

VEC report -- Tom Czaja , KG9EE, has volunteered to be our 3ed VEC representative for the club, his duty will be to back up Tom, KF9PU and John, KF9XL. Further job description is under the jurisdiction of John and Tom, KF9PU. Special note: As of the 3ed of December all license's must register with the FCC and get a CORES number instead of using your social security number.

(latest as long as you are SS, cores, WIS Your fine)

The Board will present the new By-Laws to the members for a vote at Thursdays meeting. Due notice of the new By-Laws was given two meetings ago. The board has received no request for any type of changes.

Classes -- The first class for September has started. We have no feedback at this time.

PR -- The Boy Scouts have requested that we do a show and tell. Dave will ask for a volunteer at the meeting. Maybe one of our retired teachers?

Repeater. The repeater is working on a single J-pole made by Jerry WA9CGE and running 50 watts. Tom< KF9PU, has volunteered to be on the repeater committee. He asked his fellow VEC's for ideas to improve the use of the repeater and they responded with several ideas of special nets and possible linking with other repeaters to create a chain of repeaters in our State.

The Christmas party has been organized by John, WB9PSE. John will be checking the final details and still need help with the name badges etc: Anyone want to donate flowers like WB9LNU did last year????

The Board had a discussion on the use of a receipt and members that don't fill out the renewal paperwork. Dave will discuss this further at Thursdays club meeting.

Meeting adjourned at 9:00.

Respectfully submitted,
Jim WB9LNU
Secretary

MRAC Board Meeting

10/18/2001

Previous meeting minutes were read and approved as written.

Treasurers report -- Total liquid assets \$3,713.76 plus the VEC fund and club equipment. Les has asked for help with the raffle or the membership renewals. Mark, AB9CD, has offered to handle the 10 meter radio raffle to relieve Les of that duty. To date, we have not received a good response to the 10 meter radio raffle.?! \$ 20.00 so far.

Thanks to Matt, KB9PRC, for the use of his QTH for the Board meeting.

Special note: All members don't forget to send your money for the Christmas Party. Send it either to John Merkl or the club P.O. Box.

VEC - Tom, KF9PU, says the FCC will soon be asking for your date of birth also on their forms. And they are still asking everyone to get their CORES number. Special thanks were given to Mark, AB9CD, for volunteering to help Tom with the data entry process to the FCC.

Classes -- Mark, AB9CD, says that classes have gone very well. They conducted 5 classes with 10 people. The club will be arranging an Extra class session in the spring. The exact schedule for the class is being determined. We are still checking with the teachers and their schedule. Dick, WB9PTC, is still sending CW practice. Plus the informal practice between Matt and Mark in the evenings around 9PM.

Dave has suggested the the club do a special event station for the clubs 85 birthday. We will use the clubs call, W9RH. The operator can do the special event from their ham shacks. We are thinking of March 16th between 14 and 2300 hours. We will do certificates if we have enough contacts. Rules will be provided by the club and a list of volunteers will be generated. The announcements will be made in QST and other magazines. We need operators. Operation will have to be done within your class of license, even though we are using the W9RH call. Unless you go to someone's shack that has and Extra class license.

The club will be at the 91 swap fest. We will have a table.

Special note to all members: Your dues are now due for next year!!

Repeater news: We have some hackers. Dave has turned off the ID'er sometimes to reduce the problem. We are now using the J Pole made by Jerry, WA9CGE.

Christmas Party -- Everything is set with the Machine Shed. QRM starts at 5:00 and dinner at 6:00. We can bring our own table decorations.

Budget -- Les has discussed the budget with Dave and we will hash out the details for the clubs 2002 budget at the November Board meeting. The Redemption Church needed a new wireless mic and the club purchased it for them for \$105.00 as a donation for letting us use the hall every month.

The location for the November Board meeting has not been determined yet.

(KATE)

Thursday club meeting will have a program by Matt, KB9PRC, about using car remotes on 315 mhz. and sensitive antenna's and radio's to locate people that might be buried in rubble like at the World Trade Center. The November meeting will be the conclusion to the subject. Dave hopes to have a program in January about vertical antenna's.

The meeting adjourned at 9:15.

Respectfully submitted,
Jim WB9LNU
Secretary

MRAC Board Meeting

11/26/2001

Previous meeting minutes were read and approved as written.

Treasurers report -- \$ 4193.06 in total liquid assets. The board asked that the treasurer correct the date on his hand out and also mention the interest that the club CD is earning and enter the figure into the record.

Special thanks were given to Kate, KA9MWT for the use of her QTH.

Future board meetings already set up -- April @ WB9BWP and May @ WB9LNU and June @ a restaurant so the new board members can meet with the old.

The January club meeting will have a talk by Dave, WB9BWP on vertical antennas, grounding and measuring etc:

The club has sold about \$ 90.00 so far on the 10 meter radio raffle. Jerry Wahlen has sold some tickets at the Miller Valley club.

VEC - Ton, KF9PU, nothing new to report except the club sponsored VEC group will test at the West Allis Club swap fest in January.

Classes - Patrick Moretti and Mark Tellier want about 8 weeks to do the class for EXTRA. Will start maybe in Feb. Dick, WB9PTC is still trying to help the people that want to learn CW. Still no help from the people in the club who claim they use CW all the time.

KB9RLB, Tom, will organize the clubs 85 birthday operating event using the W9RH call. It will be on March 16 and 17. Starts at 6PM the 15th. Will go 24 hours. On all bands within the operators license class. Announcements will be in the magazines. Will have QSL cards if we get enough contacts. Most QSL's via E-Mail on internet to save money or via SASE. Call Tom if you wish to be part of the fun!!

PR - Club did the 91 fest and will be at West Allis fest. Dave has new member package together.

Special notice to all members: Your dues are due NOW!!!!

Repeater news - The repeater is running 50 watts on one antenna. Some trouble with amp. Next year we will decide if the club should keep the repeater since very few use it.

Christmas party - 29 have signed up so far. WB9LNU has offered to donate 6 plants for table decorations again this year. Bill Kidd will be there. The 10 meter radio raffle will take place.

A
FATHER

In January we will have to start with a nominating committee to line up new officer and directors for the election in May. Many positions will have to be filled this time.

Club budget - Preliminary estimates show that we are ahead by \$ 250.00 this year and no longer in deficit spending.

Club Inventory - WB9LNU has supplied the board with a complete inventory of all club owned property and the location of all the equipment.

Respectfully submitted,

Jim WB9LNU
Secretary
